TOCSIN 650 & 750 SERIES

Advanced Addressable 2-Wire Gas Detection System

Introducing Tocsin 650 and 750 Series gas detection systems from IGD. These systems utilise ground-breaking Sentinel+™ intelligent addressable technology. More flexible than existing systems with better reporting and connectivity this technology ensures safety without compromise at reduced cost. Enhanced detector nodes with their own I/O capability provide distributed control and data just where needed.

TOCSIN 650

TOCSIN 750

▶ **EASY TO INSTALL**
Typical system is 40% faster to install with fewer connections

▶ **ALARM REPORTING & RECORDING**
Full event monitoring, time & date stamped with email and SMS alerts available.
Cloud based data acquisition, see your data anywhere!

▶ **FLEXIBLE**
Only uses 2-Core cable for power and communication.
Allows up to 128 Detector Nodes and 350 Devices.

▶ **COST EFFECTIVE**
New installs only use 2-Core cable minimising install costs.

▶ **REASSURINGLY COMPETENT**
Designed and manufactured in the UK by IGD
Backup by 10-year Warranty*
All compliance supported by a third-party certification

IGD

TOCSIN 650 & 750 SERIES

Advanced Addressable 2-Wire Gas Detection System

The Sentinel +™ 2-Wire technology is an advanced digitally communicating gas detection system from IGD. The system provides fast efficient error free performance specifically designed to meet the unique requirements posed by gas detection hazards. The system provides ultimate flexibility to link your gas detection system to provide alarms, interface to plant shut down hardware and communicate clearly to BMS and similar systems. 2 Core cabling for both power and communication with no polarity requirement means cabling is minimised, reducing system costs with no compromise.

Advanced Addressable 2-Wire Gas Detection System

One single 2-Core cable with no required connection polarity connects all system devices. Auto find, Auto configure and Auto update, combined with our downloadable status reports are just some of the key features of the system. This gives you the peace of mind that you have the right gas detection system doing the right job. Protecting both your plant and personnel.
